## Key Learnings

- Recall cloud service management terminology, definitions, and concepts
- Analyze an organization's strategic assets and capabilities to successfully design, deploy, and run cloud services
- Identify and explain important roles involved in cloud service management
- Identify strategies to reduce risk and remove issues associated with the adoption of cloud computing and cloud-based services
- Select appropriate structures for designing, deploying, and running cloud-based services within traditional IT organizations
- Model cloud service management principles into ICT operations and IT service management
- Predict the complexities involved in designing, deploying, and running cloud services
- Compare and contrast the differences between cloud service management and traditional IT service management

## Target audience

The Cloud Service Manager course will be of interest to IT Managers and CIOs, Service Managers (with or without an ITIL background), Service Management Professionals, Cloud Strategy and Management Consultants, Service Architects and Pre-Sales Consultants.

## Requirements

It is recommended that participants have achieved the Cloud Technology Associate certification (or its equivalent) from the Cloud Credential Council. Participants further benefit from a strong background in IT service management who have one or more ITIL certifications or practical experience in applying ITIL and IT service management best practices.

- [CCC Cloud Technology Associate \(«CCCTA»\)](#)

## Certification

The exam is available in English only.

**Exam format:** Web based, closed-book, Questions: 25 multiple choice questions, Pass score: 65%, Exam duration: 75 minutes (15 minutes extra for non-native English speakers)

You will receive a voucher for an online exam via email. You can book the exam directly in the online portal of the exam provider.

## Additional information

This course will be delivered by our partner IT preneurs.
