

IREB® Certified Professional for Requirements Engineering – Agile Primer («IAP»)

This course provides you with the necessary knowledge to actively apply agile requirements engineering methods. You will prepare optimally for the «IREB CPRE RE@ Agile Primer» exam which takes place after the last day of the course.

Duration: 2 days

Price: 1'950.–

Course documents: Course script (in German)

Content

- Basics for requirements engineering in an agile environment
- An exemplary high-level run through the requirements engineering activities at product and team level
- Artifacts in agile requirements engineering: epics, features, user story, acceptance criteria and definition of readiness
- Backlog management: detailing, cutting and prioritizing artifacts
- Events in agile requirements engineering
- Organizational view: roles and the necessary competencies in agile requirements engineering
- Agile scaling in larger organizations

Key Learnings

- Recognizing differences in requirements engineering approaches and evaluating them in context
- Actively applying agile requirements engineering methods in your own environment

Methodology & didactics

With the help of numerous practical exercises you will experience the differences in procedure, methods and documentation up first-hand.

Target audience

The course was designed for requirements engineers, business analysts, future product owners, developers in agile environments (e.g. Scrum), product managers and project managers.

Requirements

First experiences in requirements engineering and/or in an agile environment. We recommend the previous attendance of the following course.

- [IREB® Certified Professional for Requirements Engineering – Foundation Level \(«QM2»\)](#)

Certification

The examination takes place on the second seminar day at about 15.00 and lasts 40 minutes. The examination costs are included in the course fee.

For courses that take place onsite, the exam is part of the course. You write the exam in the afternoon of the last day of the course. For this purpose, an invigilator from the certification body comes to the

premises and takes the exam.

In the case of virtual courses, you register independently with the certification body SAQ for an online exam after the course and make an individual appointment. The exam date takes place after the seminar. A few days before the exam date you will receive an eMail from ProctorExam (the provider of online exams). In this eMail you will be asked to perform a system check on your device. As soon as this system check is successfully completed, you will receive another eMail with the link to the exam. On the agreed examination date, you log in via the examination link. During the exam you will be accompanied and supervised online by an exam proctor.

Format: Multiple choice questions (in German)

Additional information

This seminar is conducted in cooperation with our partner Xebia Switzerland AG.
