- Participation in or management of test process improvement programs

Target audience

This course is aimed at software tester, test manager, quality manager and project manager.

Requirements

ISTQB Certified Tester Foundation Level and 18 months of testing experience

- [ISTQB® Certified Tester Foundation Level 4.0 \(«QM3»\)](#)

Certification

The examination takes place on the last seminar day between 2pm and 5pm and lasts 180 minutes. The examination costs are included in the course fee.

For courses that take place onsite, the exam is part of the course. You write the exam in the afternoon of the last day of the course. For this purpose, an invigilator from the certification body comes to the

premises and takes the exam.

In the case of virtual courses, you register independently with the certification body SAQ for an online exam after the course and make an individual appointment. The exam date takes place after the seminar. A few days before the exam date you will receive an eMail from ProctorExam (the provider of online exams). In this eMail you will be asked to perform a system check on your device. As soon as this system check is successfully completed, you will receive another eMail with the link to the exam. On the agreed examination date, you log in via the examination link. During the exam you will be accompanied and supervised online by an exam proctor.

Additional information

This course is conducted in cooperation with our partner Xebia Switzerland AG.
