

Web Developer Professional Client Side – specialisation React («WEBDPF»)

In this course you will learn jQuery, Angular, JavaScript, TypeScript and React and become a front-end development professional.

Duration: 9 days

Price: 6'000.–

Course documents: Digicomp Courseware

Vendor code: IJQ, ANGL

Content

In four modules you will learn the best practices for the development of Rich Internet Applications with jQuery and to realize Single-Page-Applications based on Angular and React. At the end you will take an exam and receive the certificate «Web Developer Professional Client Side» after successful completion.

You can arrange the module dates according to your wishes for appointments during the week or part-time on evenings and every second Saturday.

1. Course: Introduction to jQuery («IJQ»)
2. Kurs: Applikationsentwicklung mit JavaScript (APPJS)
3. Kurs: Front-End-Entwicklung mit Angular, JavaScript und TypeScript («ANGL»)
4. Kurs: Frontend-Entwicklung mit React («FRONRE»)
5. Examination workshop: Web Developer Professional Client Side (WEBDP1)
