

Kanban System Design (Modul I) («KSD»)

Learn the basics and practices underlying the Kanban method and get the tool to successfully implement one of the most effective change processes (evolutionary change management) in your area of responsibility.

Duration: 2.5 days

Price: 2'200.–

Course documents: Personalized training material and current books (in PDF format), training photo protocol

Content

- History and significance of Kanban
- Practices and principles of the Kanban method
- Techniques for the visualization of knowledge work
- Benefits and understanding of WIP limits
- Differences between pull and push systems
- Simulation to test what you have learned right away
- Development of Kanban systems in practice
- Different flight levels (portfolio boards)
- Implementation of various feedback mechanisms in the system
- Practical application areas of the Kanban method
- Tips and tricks for a successful start with Kanban

Key Learnings

- Theoretical basics of Kanban and how it works
- Development of the Kanban system, visualization and activation of improvement potential
- Successful application of the effective change process (evolutionary change management) in your own area of responsibility
- Knowledge of WIP limits for efficiency and effectiveness in creative work
- Statistical feedback – How to read the data behind Kanban systems
- Design and implementation of a Kanban system with teams and organizational units

Methodology & didactics

This training will be offered online for the time being. It will be conducted with Zoom and the digital whiteboard Conceptboard.

The course will take place on 2.5 days to avoid 7 hours of online teaching at a stretch and to ensure that business work does not have to be left completely undone. The last half an hour is planned for questions / as a buffer.

The focus will be on the practical applicability of the learned material. Participants are given the opportunity to bring their own questions and problems into the group and solve them with guidance.

Target audience

This training is designed for team leaders, project managers, Scrum masters, Agile coaches and all those who want to optimize their organizations systemically and build Kanban boards. The training also helps you if you have already implemented Kanban and are not sure if your own Kanban system is state-of-the-art.

Requirements

Interest in the Kanban method or knowledge analogous to the following course are helpful (the certificate does not have to be presented as proof, as only an assistance, but no obligation):

- [Team Kanban Practitioner \(«TKP»\)](#)

Additional information

On request, we can organise this course for you as in-house training at your location. You are welcome to contact us if you are interested.

Further courses

- [Kanban Systems Improvements \(Modul II\) \(«KSI»\)](#)
