

# Red Hat JBoss Fuse Rapid Track («JB439»)

Take the rapid track to managing JBoss Fuse, JBoss AM-Q, and Apache Camel

**Duration:** 5 days

**Price:** 4'600.–

**Vendor code:** JB439

## Content

This 5-day course that gives Java™ developers, architects, and Red Hat JBoss Fuse administrators an understanding of [Red Hat JBoss Fuse](#), [Red Hat JBoss A-MQ](#) (Java Messaging Service broker), and Apache Camel.

Learn the skills you need to develop and implement enterprise integration patterns (EIP) using Camel, and see how to deploy EIPs in [Red Hat JBoss Fuse](#) – an enterprise service bus (ESB) built on Apache ServiceMix. In addition, learn how to use [Red Hat JBoss A-MQ](#) – a messaging platform based on Apache Camel.

- **Introduction**
  - JBoss Fuse product family
- **Red Hat JBoss Fuse**
  - Introduction
  - Install and customize
  - Management
  - Implement of OSGi in production
- **Red Hat JBoss A-MQ**
  - Install and configure
  - Customize and integrate of network of brokers
  - Increase availability and reliability
  - Increase performance
  - Connect using Java Message Services (JMS)
- **Camel**
  - Introduction
  - Develop integration solutions
  - Perform basic data transformations
  - Perform advanced data transformations
  - Perform basic components
  - Perform network-based components
  - Test applications
  - Manage error handling
  - Threading and transactions
  - Integrate Camel and Fabric

- Core concepts of OSGi-based deployment and design
- How to rapidly implement, test, and debug EIPs
- Overview of advanced EIPs
- Fundamentals of message-oriented middleware (MOM), JMS concepts, and enhancements to JMS by [Red Hat JBoss A-MQ](#)
- Numerous broker topologies
- Performance-tuning techniques
- Configuration management using Fabric

## Target audience

- Java developers and architects who need to learn how to implement EIPs using Camel, as well as how to use the messaging capabilities of [Red Hat JBoss A-MQ](#) (ActiveMQ).
- Integration system managers who need to configure and maintain networks of brokers and enterprise service bus (ESB) instances using features of Fuse Fabric.
