Dynamics 365 Supply Chain Management Functional Consultants streamline cost accounting, inventory management, master planning, and warehouse management for their clients.

Duration: 5 days
Price: 3'950.–
Course documents: Official Microsoft Courseware and Added Value Content
Vendor code: MB-330

Content

In our in-class course on «Microsoft Dynamics 365 Supply Chain Management», our Microsoft Certified Trainers will introduce you to the subject using official Microsoft courseware.

The course consists of the following topics:

1. **Configure and manage products and inventory in Dynamics 365 Supply Chain Management**
   - Product information is the pillar of supply chain and retail applications across all industries. In the various modules of a business solution, product-specific information and configuration are required to manage the business processes that are related to products, product families, bills of materials, and product categories. Inventory reports show you in a variety of ways how much inventory you have and explain how to be more effective in your inventory investments. Master planning helps you streamline your planning based on predetermined factors, so you can efficiently plan what materials need to be purchased, transferred, or manufactured.
2. **Configure and manage sales, and customers in Dynamics 365 Supply Chain Management**
   - The process of working with customers, understanding the life cycle of the sales process, and setting up sales agreements are all important factors that impact a company's success.
3. **Configure and manage procurement and vendors in Dynamics 365 Supply Chain Management**
   - The process of finding and working with vendors, purchasing products, and ensuring the quality of goods and services are all important factors that impact a company's reputation and success.
4. **Use warehouse management in manufacturing in Dynamics 365 Supply Chain Management**
   - Using warehouse management in manufacturing processes in Dynamics 365 Supply Chain Management helps optimize and streamline warehouse processes in your manufacturing environment, according to your company's needs.
5. **Configure and work with transportation management in Dynamics 365 Supply Chain Management**
   - Transportation management in Dynamics 365 Supply Chain Management helps you find the most efficient way to deliver goods to your customers. Transportation management calculates the least expensive and fastest way of delivering goods and lets you identify vendor and routing solutions for inbound and outbound orders.

Key Learnings

- Using common functionality and implementation tools
- Configuring security, processes, and options
- Performing data migration
- Validating and supporting the solution
- Implementing product information management
- Implementing inventory management
- Implementing and managing supply chain processes
- Implementing warehouse management and transportation management and perform business processes

Methodology & didactics

Digicomp Flexible Learning Approach:

- **Training modality:** During a period of 4 weeks, 6-8 half-day (3h each) virtual live sessions with our Azure MCT experts will take place. The sessions are already planned and can be easily combined with the daily work routine. Between the sessions there is enough time to process the learned knowledge.
- **Detailed Session Plan:** Click «**Timetable**» at the bottom of the page where you select your desired date.

Target audience

Participants typically specialize in one or more feature sets of Microsoft Dynamics 365 Finance, including finance, manufacturing, and supply chain management.

Requirements

General understanding of manufacturing processes, ability to use Supply Chain Management for basic processing, understand how to work with inventory management and warehouse management.

- Microsoft Dynamics 365 Fundamentals (ERP) – Intensive Training («MB920»)
