

## SAFe® 6.0 DevOps (SDP) («SDPSAF»)

Improve collaboration between development and operations teams through the combined integration of DevOps & SAFe. Learn to understand DevOps and its added value and learn to develop a continuous delivery pipeline for your organization.

**Duration:** 2 days

**Price:** 2'000.–

**Course documents:** Original Courseware (English, digital)

### Content

- DevOps overview
- Continuous Delivery Pipeline
- Continuous Exploration
- Quality management through continuous integration
- Optimization of time-to-market through continuous deployment
- Value creation/delivery through release-on-demand
- Action plan

### Key Learnings

- Integrating continuous testing and continuous security into the continuous delivery pipeline
- Connecting continuous analysis, integration and deployment and on-demand delivery
- Designing and implementing a customized DevOps implementation plan
- Assessing and improving your current state using tools such as the DevOps Health Radar and the Transformation Canvas

### Methodology & didactics

The training thrives on interaction. Numerous flipcharts etc. are created during the training. In group exercises, you are challenged to react quickly and understand what needs to be done when you return to your workplace.

### Target audience

all members of an Agile Release Train (ART), enterprise, solution and system architects

### Requirements

There are no formal requirements for participation in the course.

Experience in project management and/or IT and in particular with Scrum/Kanban is advantageous. Familiarity with the concepts and principles of Agile is also recommended.

Knowledge of SAFe is not mandatory in this case. Leading SAFe is recommended to have received an introduction to the framework.

- [Leading SAFe 6.0 \(SA\) \(«LDSAFE»](#))

### Certification

After participating in the training, you will receive access to the SAFe® DevOps Practitioner exam.

The login is valid for 30 days. Upon passing the exam, the participant will receive the «**Certified SAFe® DevOps Practitioner**» certification from the Scaled Agile Academy.

**Exam format:** multiple choice, web-based, no aids, questions: 45, pass rate: 73%, duration: 90 minutes. The exam will be held in English.

Experience has shown that seven to ten hours of independent study are required to successfully pass the exam. Our trainers will prepare you optimally for the course and will also be on hand to answer your questions afterwards.

## Additional information

This training is conducted in German and English by our training partner AgileMinds; in French by Ahead Technology.
