

## Hermes 2022 combined («HERMES»)

In this course package you will get to know, understand and use HERMES 2022 in order to prepare for the certifications «HERMES 2022 Foundation» and «HERMES 2022 Advanced». The course dates can be arranged individually.

**Duration:** 5 days

**Price:** 5'400.–

**Course documents:** Digicomp courseware

## Content

In these two HERMES seminars you will get to know the tools provided by HERMES 2022. In the first module you will prepare for the Foundation exam. Then you will deepen your knowledge in the Advanced course. You will get to know the standard IT application scenario and see how to adapt the method to the requirements of your projects. At the same time, you will prepare for the Advanced exam.

The package consists of the following courses:

- [HERMES 5 Foundation](#)
- [HERMES 5 Advanced](#)

## Key Learnings

- Knowledge of the fundamentals of HERMES project management
- Understanding the application areas and the structure of the standard scenarios service/product development/adaptation
- Gaining knowledge about the modules Project Control, Project Management, Project Basics, Procurement, Organization, Product and Implementation Organization
- Acquiring active knowledge about the creation of the project organization and role assignment
- Acquiring active knowledge about the creation of individual scenarios
- Applying the phase model in classic and agile solution development
- Executing and creating tasks and results of the standard scenarios under the responsibility of the project manager
- Adapting the methodology to the needs of the projects
- Applying project planning and organization as well as project management and controlling with classic and agile approaches
- Being familiar with the methodological elements of HERMES 2022
- Applying the HERMES online tools
- Preparation for the certification exams «HERMES 2022 Foundation» and «HERMES 2022 Advanced»

## Methodology & didactics

The seminars consist of interactive lessons with impulse contributions as well as individual and group exercises. For the exams, participants are expected to review the course material on their own in order to prepare for the exam.

Please bring a notebook or tablet with you, as the seminar will include work with the HERMES online environment.

## Target audience

These seminars are aimed at project members as well as aspiring and experienced project managers who want to learn the HERMES 2022 project management method and obtain the Foundation and Advanced certificates.

## Certification

Please send us your date of birth and hometown when you register. This information is required for the exam registration. On the day of the exam, you will need an official photo ID for identification purposes.

Both the Foundation and Advanced exams are administered online. The exams take place via the software ProctorExam. With your personalized e-mail address (which you provide when registering for the course) you will be invited by TÜV Süd with a link to the registration/examination. Once you have registered, you will be invoiced for the exam, even if you do not take it. When registering, please indicate that the invoice should be sent to Digicomp. The general terms and conditions of TÜV Süd apply.

TÜV Süd will give you the opportunity to complete the exam within a three-day time slot. This time slot is only available on weekends (Friday through Sunday inclusive). We make every effort to schedule this three-day time slot on the weekend immediately following the last day of the course. Please note that there may be exceptions. Dates will be available as soon as you register.

Directly after the exam, you will see in the system whether you have passed the exam or not. The final decision on awarding the certificate is only made after the review. You will then receive your certificate by e-mail.

For more information on the **Foundation exam** please click [here](#) and on the **Advanced exam** [here](#).
