COBIT® 2019 Foundation («GCOF19»)

This Foundation course introduces COBIT 2019 concepts, principles, and methods used to establish, improve, and maintain a system for effective governance and management of enterprise information technology.

Duration: 2 days
Price: 2'350.–
Course documents: Course folder

Content

Since its inception, COBIT has evolved into a broad and comprehensive IT governance and management framework and continues to establish itself as a widely recognized framework for IT governance.

Over the years, best practice frameworks have been developed and promoted to support the process of understanding, designing and implementing Enterprise Governance of IT (EGIT).

COBIT 2019 builds on and integrates more than 25 years of development in this field, not only incorporating new scientific findings but also putting them into practice.

- Introduction of a new framework
- Key terms and terminology
- Governance and Framework Principles
- Governance system and components
- Governance and management objectives
- Performance Management
- Design of a tailor-made governance system

Key Learnings

- Understand the context, benefits and key reasons why COBIT is used as a framework for information and technology governance
- Explain the most important attributes of the COBIT framework such as key attributes, product family and adaptation to industry conditions
- Compare COBIT principles for the governance system framework
- Describe the components of a governance system, such as governance and management objectives, components of the governance system, key issues, design factors and cascading of objectives
- Describe the elements of governance and management objectives
- Differentiation of COBIT-based performance management in consideration of maturity and capability perspectives
- Learn how COBIT can be used to develop a tailor-made governance system
- Explain the key points of the COBIT business case
- Describe the relationships between the COBIT design and implementation guidelines

Target audience

This course is aimed at all people who want to know more about IT Governance and want to apply it in practice, any stakeholder responsible for the governance and management of enterprise information and technology, such as members of the board of directors, business and IT managers, IT quality managers, risk managers, process owners, etc. as well as internal and external IT auditors.

Certification

The COBIT® 2019 Foundation certification is awarded by ISACA. You will receive the voucher in the course. The place and time of the exam to achieve the "COBIT® 2019 Foundation" certificate can be determined by each participant. The exam is monitored via a web camera and the installation of a secure browser is required.

Format: multiple choice, number of questions: 75, duration: 120 minutes, language: English, pass rate: 65%, closed book

Additional information

This course is conducted in collaboration with our partner Glenfis.
