TOGAF® EA Training Course – Foundation («TOG1»)

The TOGAF® Standard is the leading framework for enterprise architecture. With this course you will be well prepared to pass the TOGAF® Enterprise Foundation exam.

Duration: 2 days
Price: 2'400.–
Course documents: Digital courseware in English

Content

TOGAF® Standard 10th Edition is the most recent version of TOGAF®. It has a modular structure that is easier to study and adapt while covering topics such as security, agile, and business architecture. This makes the TOGAF® Standard an excellent digital transformation tool for driving change in your business.

The two-day course TOGAF® Enterprise Architecture Foundation provides the basics for applying the TOGAF® Standard 10th Edition. The course includes a voucher for the TOGAF® Enterprise Architecture Foundation certification exam.

The Certification validates that the candidate has gained knowledge of TOGAF® Standard 10th Edition terminology, structure and fundamental concepts and understands the core principles of Enterprise Architecture and TOGAF®.

The TOGAF® Enterprise Architecture Foundation certification (Level 1) is a prerequisite for qualifying as a TOGAF® Enterprise Architecture Practitioner (Level 2).

- **Interactivity guaranteed**
  - Our course engages all types of participants, including the quieter lot, and encourages sharing of ideas and team building among participants with group discussions, think-pair-share, and brainstorming.
- **Focus on effectiveness**
  - We enhance the performance of the participants during the course, and focuses on their key strengths and areas of improvement with:
    - Real-life analogies
    - Formative quizzes
    - Hands-on exercises
    - After-course study guide
    - Mock exams
  - We also make sure that people have the necessary skills to pass the exam after the course.
- **Engaging & fun**
  - We don't offer two days of theory, but a fun experience.
    - A central case study that focuses on common themes and topics in the digital transformation environment.
    - Applying the TOGAF® concepts to the case study that are engaging ways to learn, recall, and retain knowledge.

Key Learnings

- Understanding the core concepts and terminologies of the TOGAF® Standard 10th Edition
- Understanding the Architecture Development Method (ADM) and the objectives of each ADM phase
- Understanding the key outcomes of the ADM cycle
- Understanding how ADM can be adapted to the context of an organization
- Understanding the techniques available to support ADM
- Applying ADM, including iteration, partitioning, and applying it in a digital enterprise
- Understanding how architecture governance contributes to architecture development

Target audience

This course is designed for individuals who need a basic understanding of a proven framework for enterprise architecture. It targets professionals working in an organization where the TOGAF® Standard has been adopted, as well as individuals involved in architectural projects and initiatives.

Certification

The exam voucher is included in the course price.

The exam can be taken at a Digicomp PearsonVUE test centre. For more information, visit www.pearsonvue.com/theopengroup or call 0800 83 75 50.

The exam can be taken at Digicomp or at home/office (with online proctoring). Preparation time for the exam is 8–12 hours.

Exam format Part 1 exam: The exam is in closed book format and contains 40 multiple choice questions. You must score 60% (24 out of 40 questions) to pass. The exam takes 60 minutes to complete.
