

TOGAF® EA Training Course: Level 1 and 2 combined («TOG»)

The TOGAF® Standard is the leading framework for enterprise architecture. With this course you will be well prepared to pass the TOGAF® Enterprise Architecture exams at Level 1 (TOGAF® EA Foundation) and Level 2 (TOGAF® EA Practitioner).

Duration: 4 days

Price: 4'400.–

Course documents: Digital courseware in English

Content

TOGAF® Standard 10th Edition is the most recent version of TOGAF®. It has a modular structure that is easier to study and adapt while covering topics such as security, agile, and business architecture. This makes the TOGAF® Standard an excellent digital transformation tool for driving change in your business.

The TOGAF® Standard 10th Edition interactive classroom training course combines the curricula of TOGAF® Level 1 (Foundation) and Level 2 (Practitioner) in just four days. The course includes a voucher for TOGAF® Enterprise Architecture combined certification exams (TOGAF® Enterprise Architecture Foundation and Practitioner).

Certification validates that the candidate has gained knowledge of TOGAF® Standard 10th Edition terminology, structure and fundamental concepts and understands the core principles of Enterprise Architecture and TOGAF®. TOGAF® Enterprise Architecture Training Course Level 2 content focuses on the practical application of the TOGAF® framework and builds on the fundamental knowledge and understanding of Level 1. Practical scenarios are used to implement concepts.

- **Interactivity guaranteed**
 - Our course engages all types of participants, including the quieter lot, and encourages sharing of ideas and team building among participants with group discussions, think-pair-share, and brainstorming.
- **Focus on effectiveness**
 - We enhance the performance of the participants during the course, and focuses on their key strengths and areas of improvement with:
 - Real-life analogies
 - Formative quizzes
 - Hands-on exercises
 - After-course study guide
 - Mock exams
 - We also make sure that people have the necessary skills to pass the exam after the course.
- **Engaging & fun**
 - We don't offer some boring 750-page TOGAF® book, or four days of theory, but a fun experience.
 - A central case study that focuses on common themes and topics in the digital transformation environment.
 - Applying the TOGAF® concepts to the case study that are engaging ways to learn, recall, and retain knowledge.

- The core concepts and terminologies of the TOGAF® Standard 10th Edition
 - Understand and apply the concept of building blocks
 - How an enterprise architecture can be partitioned to meet the specific needs of an organization
 - How to apply iteration and different levels of architecture with the Architecture Development Method ADM
- Applying the ADM phases when developing an enterprise architecture
 - TOGAF® recommended techniques when developing an enterprise architecture such as stakeholder management
 - The content of the key deliverables of the ADM cycle
 - How to adapt the ADM for security
 - How to adapt the ADM to the context in an organization
- Implementation of the architecture
 - Developing the target architecture
 - Migration plans and strategy
 - Architecture roadmap
- Governance of the architecture
 - How architecture governance contributes to the architecture development cycle
 - The role of the architect in implementation and governance
- Key elements of the architecture content framework
 - The purpose of the architecture repository
 - How to use the enterprise continuum to manage architectural assets
 - Key elements of the TOGAF® content metamodel and how it is used for modeling and developing reusable components

Target audience

This course is aimed at people who want to gain a deeper understanding of TOGAF® Standard 10th Edition, e.g. system integrators, operational, business and IT developers, CIOs and IT managers, program and project managers, IT specialists, and architects.

Also addressed are professionals working in an organization where TOGAF® Standard has been deployed and who need to participate in architectural projects and initiatives.

Also, architects who will be responsible for the development of architectural artifacts, who wish to introduce TOGAF® Standard into an architectural practice or who wish to obtain a recognized qualification to demonstrate their detailed knowledge of TOGAF® framework.

Certification

The exam voucher is included in the course costs.

The exam can be absolved in a [Digicomp PearsonVUE test center](#). For further information, please visit www.pearsonvue.com/theopengroup or call 0800 83 75 50.

The exam can be done at Digicomp or at home/office (with online proctor). The exam preparation time is between 8-12 hours.

Exam schedule:

Level 1 Exam: The exam is in closed-book format, and includes 40 multiple-choice questions. The pass score is 60% (24 out of 40 questions). The exam lasts for 60 minutes and can be taken at PearsonVUE test centers.

Level 2 Exam: The exam is in open-book format, and includes 8 complex multiple-choice, scenario-based questions. The pass score is 60% (5 out of 8 questions). The exam lasts for 90 minutes and can be taken at PearsonVUE test centers.

Level 1 and 2 Combination Exam: This exam consists of two separate sections. The TOGAF® 10 Foundation Level 1 exam is closed-book. The TOGAF® 10 Certified Level 2 exam, Section 2 is open-book. (Note: At Prometric testing centers, an electronic copy of the specification is built into the test and is only available in Part 2). Time limit: 150 minutes total. Each section has a maximum time limit as follows: 60 minutes on TOGAF® 10 Foundation Level 1 and 90 minutes on TOGAF® 10 Certified Level 2. Once you have completed the TOGAF® 10 Foundation Level 1 section, you cannot go back.
